17.	Rate to Teacher how they utilized tools for teaching?	59	71	29	6	0
18.	Is the teaching and non-teaching staff cooperative?	159			6	

Student Feedback Analysis Report 2021-22

19.	Any suggestions about syllabus to include any new subject or technology?	✔ Data analysis, software developer, sales, money management and work life balance. ✔ BMS degree should have at least one technical subject in every semester ✔ Add framework and libraries like react, node ✔ All subjects are interesting ✔ Focus on Practical based practice on Industrial perspective. IOT, ML based project. ✔ Add software testing concepts like manual or automation ✔ Syllabus coverage or teaching has good but some improvement should be taken like projector , practical way of learning (presentation, mock interviews)
20.	Any suggestions?	✔ Overall in IMRD teaching, extra-curricular and every single activity done was just amazing and I learned too much. It's great experience. ✔ With theocratic studies please start a more practical one. ✔ It would be an added benefit to our skills if Junit Testing is part of the syllabus and it's important in projects as well. ✔ Understands the students about their condition and emotional support for students when they are frustrated ✔ Ask students about where they want to go and guide with proper instructions. Frontend, backend, fullstack, Data, Cloud, support. Arrange hackathons, exams.

13	Are you interested in conducting any A Guest Lecture/ A Special Talk /A Motivational Session?	41	11
14	Are you willing to contribute to the development of the Institute?	48	4

Sr.no	Questions	

15	Any suggestions about the syllabus to include any new subject or technology?	□ In my opinion, python and machine learning should be included in the syllabus. □ IMRD should conduct a session on programing or logic buildings □ In Technical all is good i think we should give more Focus to better Communication because as of now my experience to work in this organization mostly they checked our communication how to interact with clients or team as well as apart from technical. □ If possible please take or add any subject or do an activity daily basis where a student can develop his anchoring skill not for particular but for professional, with the help of that he can learn more, get willingness to do something different than others, he will get power to speech in front of anyone. As we are part of the corporate sector there I have learnt that if you have a presentation skill you can do whatever you want. □ Regarding IOT and Cloud Advancements as it is the current trend in Computing Industry □ Add some new technologies in the syllabus . □ Must be focused on core basics and practical knowledge □ More case study based subjects could be taken
16	Any suggestions?	□ As many of our batch mates are mapped to support projects due to their low or insufficient technical knowledge IMRD should conduct session for Boosting a technical knowledge among the student's □ Our students are very smart but our students have more problems in speaking English, so they should have some activities to make them speak English better. □ If possible please try include Quantitative aptitude reasoning, because if he has cleared any graduation level exam, But he can't able to crack any entrance test where included quant reasoning subject he/she will not applicable to join that particular places where he want. Even in any other exams we have to crack the Quant reasoning subject first, then we will be eligible for that job. That's all, thank you. □ Students also have knowledge of actual working

		processes in industry so that management requires to arrange some extra sessions from the IT industry. □ Regular presentation to improve presentation and speaking skills. Exposure to corporate case study competitions on platforms like Unstop.

Student Feedback Analysis Report 2021-22

- Syllabus frame by university is absolutely fine.
- Students need to update their technical programming skills
- Students should join the organization if they have been selected through Process.
- This will be fruitful for both organizations.
- Nope institute and placement officer is doing well.
- Students must be familiar with efficient coding.
